

Write a python function to sort a list in ascending order.

```
def ascending(list):  
    new_list=sorted(list)  
    return new_list  
number=[40,32,45,67,89]  
result=ascending (number)  
print("original list:",number)  
print("sorted list:",result)
```

Output:

```
original list:[40,32,45,67,89]  
Sorted list:[32,40,45,67,89]
```
