

Write a python program to find the square root of a number using the Newton-Raphson method

```
n= float(input("Enter a number:"))
x=n
while True:
    root=0.5*(x+n/x)
    if abs(root-x)<0.00001:
        break
    x= root
print("square root:",root)
```

Output:

Enter a number:269

Square root:16.4012194668575797
