

Write a python function to check if a number is prime or not.

```
def prime(number):  
    if number<=1:  
        return False  
    for i in range(2,number):  
        if number%i==0:  
            return False  
    return True  
print(prime(11))  
print(prime(4))  
print(prime(1))
```

Output:

True

False

False
