

Write a python function to remove duplicate elements from a list.

```
def remove_duplicate(input_list):  
    return list(dict.fromkeys(input_list))  
numbers=[1,2,3,4,4,5,6,22,2]  
unique_numbers=remove_duplicates(numbers)  
print(unique_numbers)
```

Output:

```
[1,2,3,4,5,6,22]
```
