

```
# Python program to calculate the area of a rectangle

length = float(input("Enter the length of the rectangle: "))
width = float(input("Enter the width of the rectangle: "))

area = length * width
print(f"The area of the rectangle is: {area}")
```

Output:

```
Enter the length of the rectangle: 15.5
Enter the width of the rectangle: 4.0
The area of the rectangle is: 62.0
```
